COURSE-IN-A-BOX · INSTRUCTOR LICENSE

Teach Python Data Science — Without Building It Yourself

A ready-to-deliver course that turns learners who already write Python into working analysts: NumPy, pandas, Matplotlib, statistics and A/B testing, SQL, web scraping and APIs, and dashboards, all on one company's data, ending in an independent capstone report.

21	41	63	252
3-HOUR SESSIONS	LESSONS	CLASS HOURS	SELF-CHECK ITEMS + KEYS

WHAT YOU GET

FOR EVERY SESSION (×21)

- **Facilitator guide**: a 0:00–3:00 agenda, scripted live demos, the mistakes to expect, what to cut if you run long
- **Participant workbook**: key ideas, worked examples, predict-then-run items, a 12-item self-check
- **Answer key**: every item explained, including why each wrong option is wrong
- **Slide deck** and **labs**: new starter and solution programs on the course data

ACROSS THE KIT

- Combined, print-ready books: **Facilitator Guide** (520 pages), **Participant Workbook** (337 pages), **Answer Key** (358 pages)
- **Slide decks** (708 slides) and **runnable lab files** (90 starter/solution pairs), verified by a one-command checker that also runs offline
- **Two checkpoints** (Sessions 13 and 18), a **capstone** with a **final assessment** rubric, a **setup guide** and a public **syllabus**

WHY INSTRUCTORS CHOOSE IT

- **One dataset, start to finish.** Pinecrest Outfitters, a fictional outdoor retailer: two years of orders, store traffic, weather, a survey, a checkout experiment, a SQLite database and a messy export with 22 documented flaws. No privacy risk.
- **Web lessons that never hit a real site.** A practice shop to scrape (online, or served from a zip) and a practice API on each laptop, with keys, tokens and rate limits. Saved fixtures let every lab run offline.
- **Honest pacing.** Each 75–110-minute lesson is split: mental model, live demo, guided lab and project start in the room; the rest at home, about two to three hours a week.
- **Only free tools.** Python 3.12+, JupyterLab or VS Code, Chrome, open-source libraries. No accounts, no paid keys.
- **For** trainers, bootcamps, colleges and CE, corporate L&D and workforce programs; weekly, twice weekly or intensive.

LICENSE & PRICING

SOLO

[$1,497] one-time

One instructor · unlimited students · print the workbook for your class

ORGANIZATION · MOST POPULAR

[$4,997] one-time

Everything in Solo · unlimited instructors at one organization

WHITE-LABEL

[$9,997] one-time

Everything in Organization · your branding · edit and adapt

Optional updates subscription [$299/yr]. The dataset, practice shop and practice API are part of the licensed materials; full terms in `LICENSE.md`. Ask for a sample session: rays-home.netlify.app/contact.
